MODULE

PROGRESS

	<div>Introduction to Academy</div> <div>8 Sections Fundamental General</div> <p>This module is recommended for new users. It allows users to become acquainted with the platform and the learning process.</p>	<div>100% Completed</div> <div></div>
	<div>SQL Injection Fundamentals</div> <div>17 Sections Medium Offensive</div> <p>Databases are an important part of web application infrastructure and SQL (Structured Query Language) to store, retrieve, and manipulate information stored in them. SQL injection is a code injection technique used to take advantage of coding vulnerabilities and inject SQL queries via an application to bypass authentication, retrieve data from the back-end database, or achieve code execution on the underlying server.</p>	<div>100% Completed</div> <div></div>
	<div>Web Requests</div> <div>8 Sections Fundamental General</div> <p>This module introduces the topic of HTTP web requests and how different web applications utilize them to communicate with their backends.</p>	<div>100% Completed</div> <div></div>
	<div>Introduction to Networking</div> <div>21 Sections Fundamental General</div> <p>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</p>	<div>100% Completed</div> <div></div>
	<div>Windows Fundamentals</div> <div>14 Sections Fundamental General</div> <p>This module covers the fundamentals required to work comfortably with the Windows operating system.</p>	<div>50% Completed</div> <div></div>
	<div>Introduction to Web Applications</div> <div>17 Sections Fundamental General</div> <p>In the Introduction to Web Applications module, you will learn all of the basics of how web applications work and begin to look at them from an information security perspective.</p>	<div>100% Completed</div> <div></div>
	<div>Footprinting</div> <div>21 Sections Medium Offensive</div> <p>This module covers techniques for footprinting the most commonly used services in almost all enterprise and business IT infrastructures. Footprinting is an essential phase of any penetration test or security audit to identify and prevent information disclosure. Using this process, we examine the individual services and attempt to obtain as much information from them as possible.</p>	<div>42.86% Completed</div> <div></div>

Web Attacks

18 Sections Medium Offensive

This module covers three common web vulnerabilities, HTTP Verb Tampering, IDOR, and XXE, each of which can have a significant impact on a company's systems. We will cover how to identify, exploit, and prevent each of them through various methods.
